

Lin Xin

GAME DESIGNER

Singapore | soniclinox@gmail.com | <https://linx-z0.github.io/portfolio/> | <https://www.linkedin.com/in/xinl0/>

PROFESSIONAL SUMMARY

Game Design and Computer Science student at DigiPen Institute of Technology Singapore with a focus on game systems design, mechanics design, technical design and level design, supported by a strong programming and mathematics foundation.

Experienced in designing gameplay systems, gameplay loops, combat mechanics, player progression, levels and encounters, as well as prototyping, playtesting, balancing and producing Game Design Documents (GDDs). Proficient in C, C# and C++, with experience working with custom game engines and multidisciplinary development teams.

Interested in Game Design, Systems Design, Technical Design, Gameplay Design and Level Design roles.

SKILLS

Game Design: Game Systems Design | Mechanics Design | Gameplay Loops | Combat Design | Encounter Design | Level Design | Player Progression | Prototyping | Game Balancing | Playtesting | Iterative Design | Pacing | Game Design Documentation (GDD)
Technical Design: Gameplay Implementation | Gameplay Tuning | AI Behavior Design | Level Implementation | System Integration | Debugging | Technical Documentation

Programming: C | C# | C++

Engine & Tools: Unity | Unreal Engine | GitHub | Visual Studio | Figma | Jira | Notion | Canva

Technical: Probability & Statistics | Linear Algebra | Calculus | Data Structures | Algorithms | Algorithm Analysis | Math Library Design | Problem Solving

GAME PROJECTS

Level Design Coursework

DigiPen Institute of Technology Europe, Bilbao | Encounter Design | Pacing & Player flow | Year 2 Trimester 3

- Designed multiple top-down and platforming levels with a focus on player flow, spatial progression, gameplay pacing and challenge curves.
- Designed a map supporting an approximately two-hour campaign, including quests, encounters, events, pacing curves and progression beats.
- Created smaller-scale levels under predefined spatial, thematic and mechanical constraints.
- Designed platforming levels in Mega Man Maker, focusing on mechanical introduction, escalation, cadence and difficulty progression.
- Produced level-design documentation explaining layout decisions, intended player behavior, objectives, pacing and design rationale.
- Achieved an A+ for the Level Design module.

Death's Refrain, 2D Top-Down Grid-Based Game – Design Lead

DigiPen Institute of Technology Singapore | 9-Person Team | Custom Game Engine | Year 2 Trimester 1 & 2

- Developed a 2D top-down, grid-based tactical game as part of a six-programmer team using a custom-built game engine following an initial Unity prototype.
- Created a tactical combat system built around Action Point management, grid movement, melee and ranged combat, defensive mechanics and turn-based decision-making.
- Worked within a combat design that emphasized positioning, line-of-sight, resource management and enemy prioritization.
- Contributed to encounters featuring distinct enemy archetypes including melee pursuit, ranged line-of-sight attacks, respawning enemies and a multi-attack boss encounter.
- Helped develop a progression structure incorporating increasingly complex enemy compositions, environmental hazards, pickups, permanent upgrades and boss encounters.
- Lead the integration and iteration of gameplay, level progression, UI feedback, audiovisual elements and narrative sequences.
- Worked from a detailed Game Design Document and gameplay wiki covering mechanics, enemies, progression, controls, levels, UI and narrative systems.

Aquit, Physical Deck Building Card Game – Design Lead

DigiPen Institute of Technology Singapore | 6-Person Team | Game Systems & Mechanics Design | Year 1 Trimester 3

- Designed a lawyer-themed single-player PvE card game.
- Took primary responsibility for the design of the game's core systems and mechanics, defining interactions between cards, resources, player actions and game states.
- Designed interactions between the game's deck-building phase and gameplay phase, creating strategic decisions before and during play.
- Conducted repeated playtesting, balancing and iterative design, adjusting mechanics and numerical values based on observed gameplay.
- Analyzed system interactions to improve strategic depth, pacing, player decision-making and overall game balance.
- Produced a comprehensive rulebook documenting gameplay systems, mechanics and interactions.
- Developed the project into a fully playable physical game.

Conquest, Physical Positional Strategy Board Game – Design Lead

DigiPen Institute of Technology Singapore | 6-Person Team | Systems Design | AI/NPC Behavior | Year 1 Trimester 3

- Designed gameplay systems for a single-player positional strategy board game against a pre-designed AI opponent.
- Created a custom map structured around tactical positioning, movement and spatial decision-making.
- Designed map-dependent systems including formation mechanics and NPC movement behaviors.
- Developed interactions between movement rules, positioning, map layout, AI behavior and player strategy.
- Took a major role in systems design, mechanics design, balancing and iterative playtesting.
- Contributed to a complete rulebook documenting the game's systems and mechanics.

PROFESSIONAL EXPERIENCE

DigiPen Institute of Technology Singapore

Sep 2025 - Jan 2026

Teaching Assistant

- Assisted in teaching mathematics and computer environment during scheduled classes.
- Guided students through mathematical problems, technical concepts and engineering exercises.
- Conducted additional after-school consultation and support sessions for students requiring further help.
- Adapted explanations and problem-solving approaches based on individual student understanding.
- Developed strong technical communication, mentoring, and problem-solving skills through regular interaction with students.

Singapore Cybersports & Online Gaming Association - SCOGA

Apr 2019 - Oct 2019

Events & Media Intern

- Contributed to the planning and execution of gaming and esports events including Campus Game Fest.
- Created and managed social media content supporting events and community initiatives.
- Assisted in the production of WELP Tonight — Welcome Everyone, Let's Play, a Twitch programme featuring celebrity guests and gaming culture.
- Supported event operations and media production within Singapore's gaming community.

EDUCATION

DigiPen Institute of Technology Singapore, Singapore

Sep 2024 - Present

BSc Computer Science in Interactive Media and Game Development

- Developing games across 2D, 3D, VR, and custom-engine environments with experience spanning both game design and technical implementation.

Eunoia Junior College

Jan 2020 - Dec 2021

GCE A-Level

LANGUAGES & CROSS-CULTURAL EXPERIENCE

English: Fluent | Chinese: Professional Working Proficiency

Bicultural Studies Programme (BSP): Completed a four-year MOE programme from Secondary 3 to JC 2 focused on contemporary China, the West, and their intersections from a Singaporean perspective.
