Mechanics

A = Jump

A' = Spring Jump

B = Negate/reflect damage by jump

B' = Negate/deal damage by charged dash

C = Attack with chosen weapon

C' = Break block with weapon

E = Build block

E' = Alternate building to climb wall

F = Disappearing platform

Theme

Primary focus : Fighting

Secondary focus: Freedom

Fivenite was inspired by hit game Fornite. I attempted to create a more carefree and “braindead” experience, by allowing players to choose their starting weapon and just having a bunch of fighting levels. In order to ensure difficulty remains lower, I added an appropriate amount of checkpoints, heals, and ammo reserves. I also added abit of terrain manipulation in terms of breaking and building to try to make the levels abit more interesting and make sure players aren’t bored with just combat all the time

Cadence

Zone	Room / Challenge	Cadence	Intensity
1	Choose weapon and jump down	A	1
2	Use jump reflect, then charged dash reflect	B + B'	3
3	Attack while jumping and reflecting	A + B + C	2
4	Combat on disappearing platform	A + C + F	4
5	Break block to obtain new weapon and fight enemy	A + C + C'	3
6	Use new weapon to build block and continue	A + E	3
7	Avoid fire waves while fighting frog, then spring jump up	A' + B + B' + C	5
8	Kill frog with chosen weapon	C	4
9	Build blocks alternately to climb while killing enemy	C + E'	5
10	Reflect bullets, kill enemy, get key, open boss door	B + B' + C	6
11	Boss fight using everything possible	A + B + B' + C + C' + E	7

Intensity Curve
